

MBH Bázis Hazai Rövid Kötvény Alap

(MBH „Base” Domestic Short Term Bond Fund)

Monthly Fact Sheet – 31 May 2024

www.mbhalapkezelo.hu

Investment policy

The Fund's objective is to provide a competitive return for the investors with a low risk profile. The Fund Manager's primary objective in investing the Fund's assets is safety, but it seeks to achieve real capital appreciation in addition to value preservation. The Fund invests its assets primarily in government securities, treasury bills, government bonds, government guaranteed and central bank eligible securities and bank deposits issued by the Hungarian State. Depending on the prevailing interest rate conditions, the Fund Manager determines the proportion of short- and long-term, fixed- and variable-rate securities and schemes in such a way as to ensure the highest possible return for investors while ensuring a low volatility of the increase in the net asset value. In constructing the portfolio, the Fund Manager will also pay particular attention to ensuring that the overall interest rate risk of the Fund remains moderate.

Recommended for

For those investors who want to place their savings for at least 1 year with low risk.

Investment activity

We reach the MNB's 1-week paper again, therefore we replaced the fund's assets up to the limits. During the month, the fund held its investments in floating rate government bonds, sovereign bonds, MREL bonds denominated in foreign currency combined with FX hedge to achieve a more favorable return than domestic money market returns. We continue to hold an underweight position in the HGB market.

Glossary

Unit Price (Net Asset Value per Unit): shows how much of the Fund's assets are available per unit, at which value units can be purchased or redeemed. We present the unit price according to the date of preparation of the report - the last distribution day of the previous month.

Settlement: how long after the purchase / redemption order the financial settlement takes place. (Eg: in the case of day T + 3, the transaction will be settled according to the unit price valid on the 3rd trading day after the order is placed.)

Investment period: the investment period is usually divided into short, medium and long term. In the short term, they typically think for a period of about one year, in the medium term for a period of about one to three years, and in the long term for more than 5 years. The recommended minimum investment period is determined in relation to the Fund's risk (the degree of historical exchange rate fluctuations experienced).

ISIN: (International Securities Identification Number): a unique international identifier for securities.

Aggregate risk indicator: provides guidance on the risk level of this product relative to other fund products. It shows how likely this product is to cause a financial loss because of the market movements or because we cannot pay you. The indicator is based on the fluctuations in daily returns of the retrospective values modelled on the Fund's theoretical portfolio composition over the past 10 years. Lower values typically mean lower risk and lower expected returns, while towards higher values the risk and expected return increase. This classification may change over the life of the Fund.

Net asset value: the assets of investment funds less the value of their liabilities, the market value of the total assets managed by the fund. We present a value determined according to the date of preparation of the report - the last distribution day of the previous month.

Portfolio: means the composition and totality of the assets held by investment funds.

Standard deviation: the average deviation of the yields from the average value, ie the fluctuation of the daily yields achieved in the past, the table shows data (6 years, 1 year and 3 years) looking back from the date of reporting - the last distribution day of the previous month.

Sharpe ratio: the ratio of excess return over risk-free return to standard deviation, the table shows data for the 6-month, 1-year and 3-year periods from the date of reporting to the date of reporting - the last trading day of the previous month.

Max Drawdown Indicator: Shows the percentage of the largest rate drop since the start of the Fund compared to the highest exchange rate value achieved in the past.

Legal disclaimer

More detailed information about the costs related to distribution (purchase, holding, redemption) of investment units, the risks and investment policy of the Fund, is available in the Fund's Prospectus and Management Policy, as well as at the distribution places.
